

Contractors: Working on a manufactured home?

Protect your customers — and yourself!

Before you install a wood stove or a heat pump or alter any manufactured/mobile home's systems, you must obtain an alteration permit from the nearest Labor and Industries office.

Examples of alterations requiring inspection include:

- **Installing a heat pump or air conditioning**
- **Installing a wood, pellet or gas stove**
- **Changing appliances from electric to gas**
- **Electrical or plumbing changes**
- **Structural changes or additions**

Failure to obtain a permit and inspection could affect:

- **The safety of the home**
- **Your customer's ability to sell or rent the home**
- **Your customer's ability to collect on insurance claims**

Play it safe — give us a call BEFORE you alter a manufactured/mobile home and let us help you!

Find your nearest L&I field office for more information
